

Wellbeing Assessment Tool;

Developed in Adobe Captivate 2019 Release (11.5.1.499)

Based on a survey report following the onset of Covid-19, we got to know that:

88%

Managers reported experiencing moderate to extreme stress over the past 4-6 weeks.

40%

Managers of managers say they're concerned about the lack of social interaction among colleagues.

43%

Managers are concerned about weight gain and poor mental health.

The Approach

Scope the challenge

Managers are spending more time over calls and losing in-person connect with their team members which in turn is leading to stress and affecting the mental health.

Identify the audience

People Managers at all levels.

Define the solution

The assessment tool allows the managers to assess themselves on the four pillars of the wellbeing framework and feel engaged, satisfied, and productive at work.

Implementation and assessment

The SCORM package was uploaded to our in-house LMS and assigned to all the managers in India Development Center, Walmart. The tool encouraged 98% of the managers to focus on their wellbeing.

Learning Design

Project Design

The simplified layout has elements well organized on-screen adding value to the learning experience.

The project leverages design principles and color theory to provide an aesthetically appealing experience.

The intuitive design provides easy to navigate User Interface.

The overall project design is in-line with our brand and positively impacts our target audience.
